## We make unique curtain poles, finials and accessories that bring your window treatments to life

Our collections span from classic to contemporary and are all designed and manufactured in our North London workshop. We aim to create beautiful products that stand the test of time and may become the antiques of the future.

# Our story

Byron and Byron was created in 1984 by a young Italian, Orazio Gualtieri. Armed with a knowledge of wood finishing and fine art framing and unable to find a suitable pole for his own home, he set out to create a collection of curtain poles that would be worthy of the beautiful soft furnishings that were widely available.

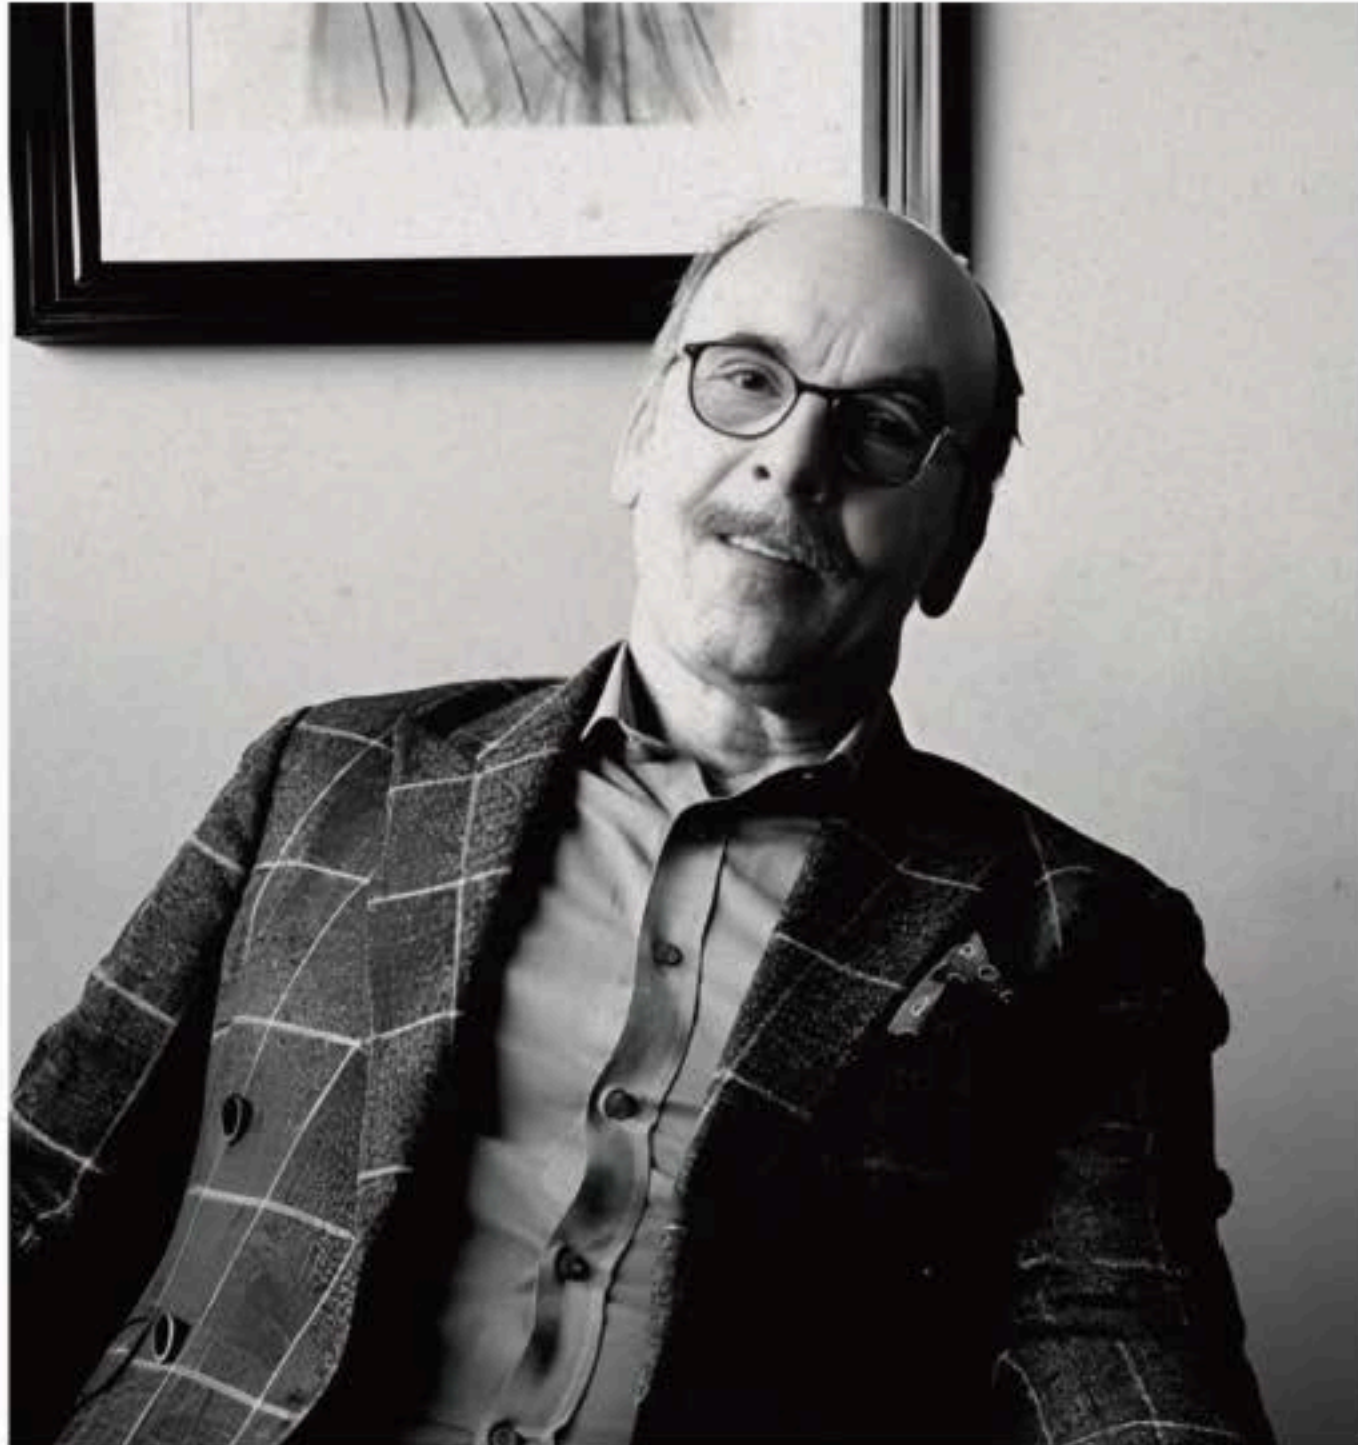

Fundamental from the start was the ability to have control over the whole process from design to manufacture. A steadfast commitment to the process of "making", the craftsmanship involved in achieving beautiful finishes and the expertise required to solve technical problems has always been key.

Although the company now works from rather larger, more mechanised premises the skills required to create beautiful products are still retained in-house. The focus is on retaining and nurturing skills that are becoming scarce whilst embracing new technology and innovation where appropriate.

Having an army of gilders, technicians and craftspeople working on-site, every day, is a luxury that facilitates the ability to respond to new trends, colours and technical advances at speed. It also puts us in a position to be able to offer a uniquely bespoke service to the requirements of our customers. There is very little, made of wood, that we cannot make!

Still very much an independent, family-run business with Orazio at the helm, we can now bank our forty years of knowledge and experience. Our passion and enthusiasm for the product remains undimmed as does our quest to overcome any new challenges, technical or artistic, that we may encounter now or in the future.

*"What is the point of spending a lot of thought, time and money on a pair of beautiful curtains only to hang them off an indifferent pole"*

**Orazio Gualtieri**

## Our collections

From traditional organically aged wood with visible depth and grain to decorative, antiqued golds and neons. Our collections have been thoughtfully designed and curated to complement the depths of all window settings and add that extra detail and focus that brings window treatments to life.

## BARNWOOD

Inspired by the organic ageing process of wood, this collection has a very natural and contemporary feel. Its simple style and muted tones fit perfectly in both a traditional and modern setting.

## RUSTICA

With a more rustic finish, this collection emphasises warm and elegant tones that accentuate the natural grains of the wood. Inspired by the country decor of English cottages and French farmhouses.

## MANOR

From the soft opulence of aged paint antique finishes to the more traditional golds, silver and a waxed black, inspiration is drawn from the Victorian Gothic era with a dash of modern style. Creating an elegant, timeless and magnificent addition to any interior.

## FLORAL

Bringing that extra detail to your window setting, this collection looks to classic vintage designs inspired by the natural forms and curves in flowers, adding a touch of elegance and femininity. From soft creams and metallic finishes to bold bursts of colour in our very vibrant, modern pop art inspired palette, they create a stunning talking point.

## HERITAGE

Our Heritage collection has been developed from our archive over the past forty years drawing on the craftsmanship, skill and eccentricity we are known for. Our Classic range capitalises on the pliability of wood as a medium and our Decorative range, with its intricate design, resonates with bygone days from Florentine Renaissance to Victorian Splendour.

## FRENCH RETURN

Our French Return collection comes in contemporary wood or acrylic with a modern metal bracket in a number of finishes. As the pole bends round to meet the wall it creates a clean, snug look with the benefit of also minimising any potential draft or light as the curtain sits flush to the wall. The collection also comes in a double pole option so you can layer up sheer panels and curtains to create a softer, more elegant window setting.

# Bespoke Services

## Paint and Finish

We are often asked whether we can finish our products in a paint colour that is being used for either walls, woodwork or other aspects of the interior design. With our paint and finish service all we need is a British Standard, Dulux, Farrow and Ball, Little Greene or RAL paint reference and will do our best to match it. Or If we can't match it, you can provide your own. Please get in touch for further information.

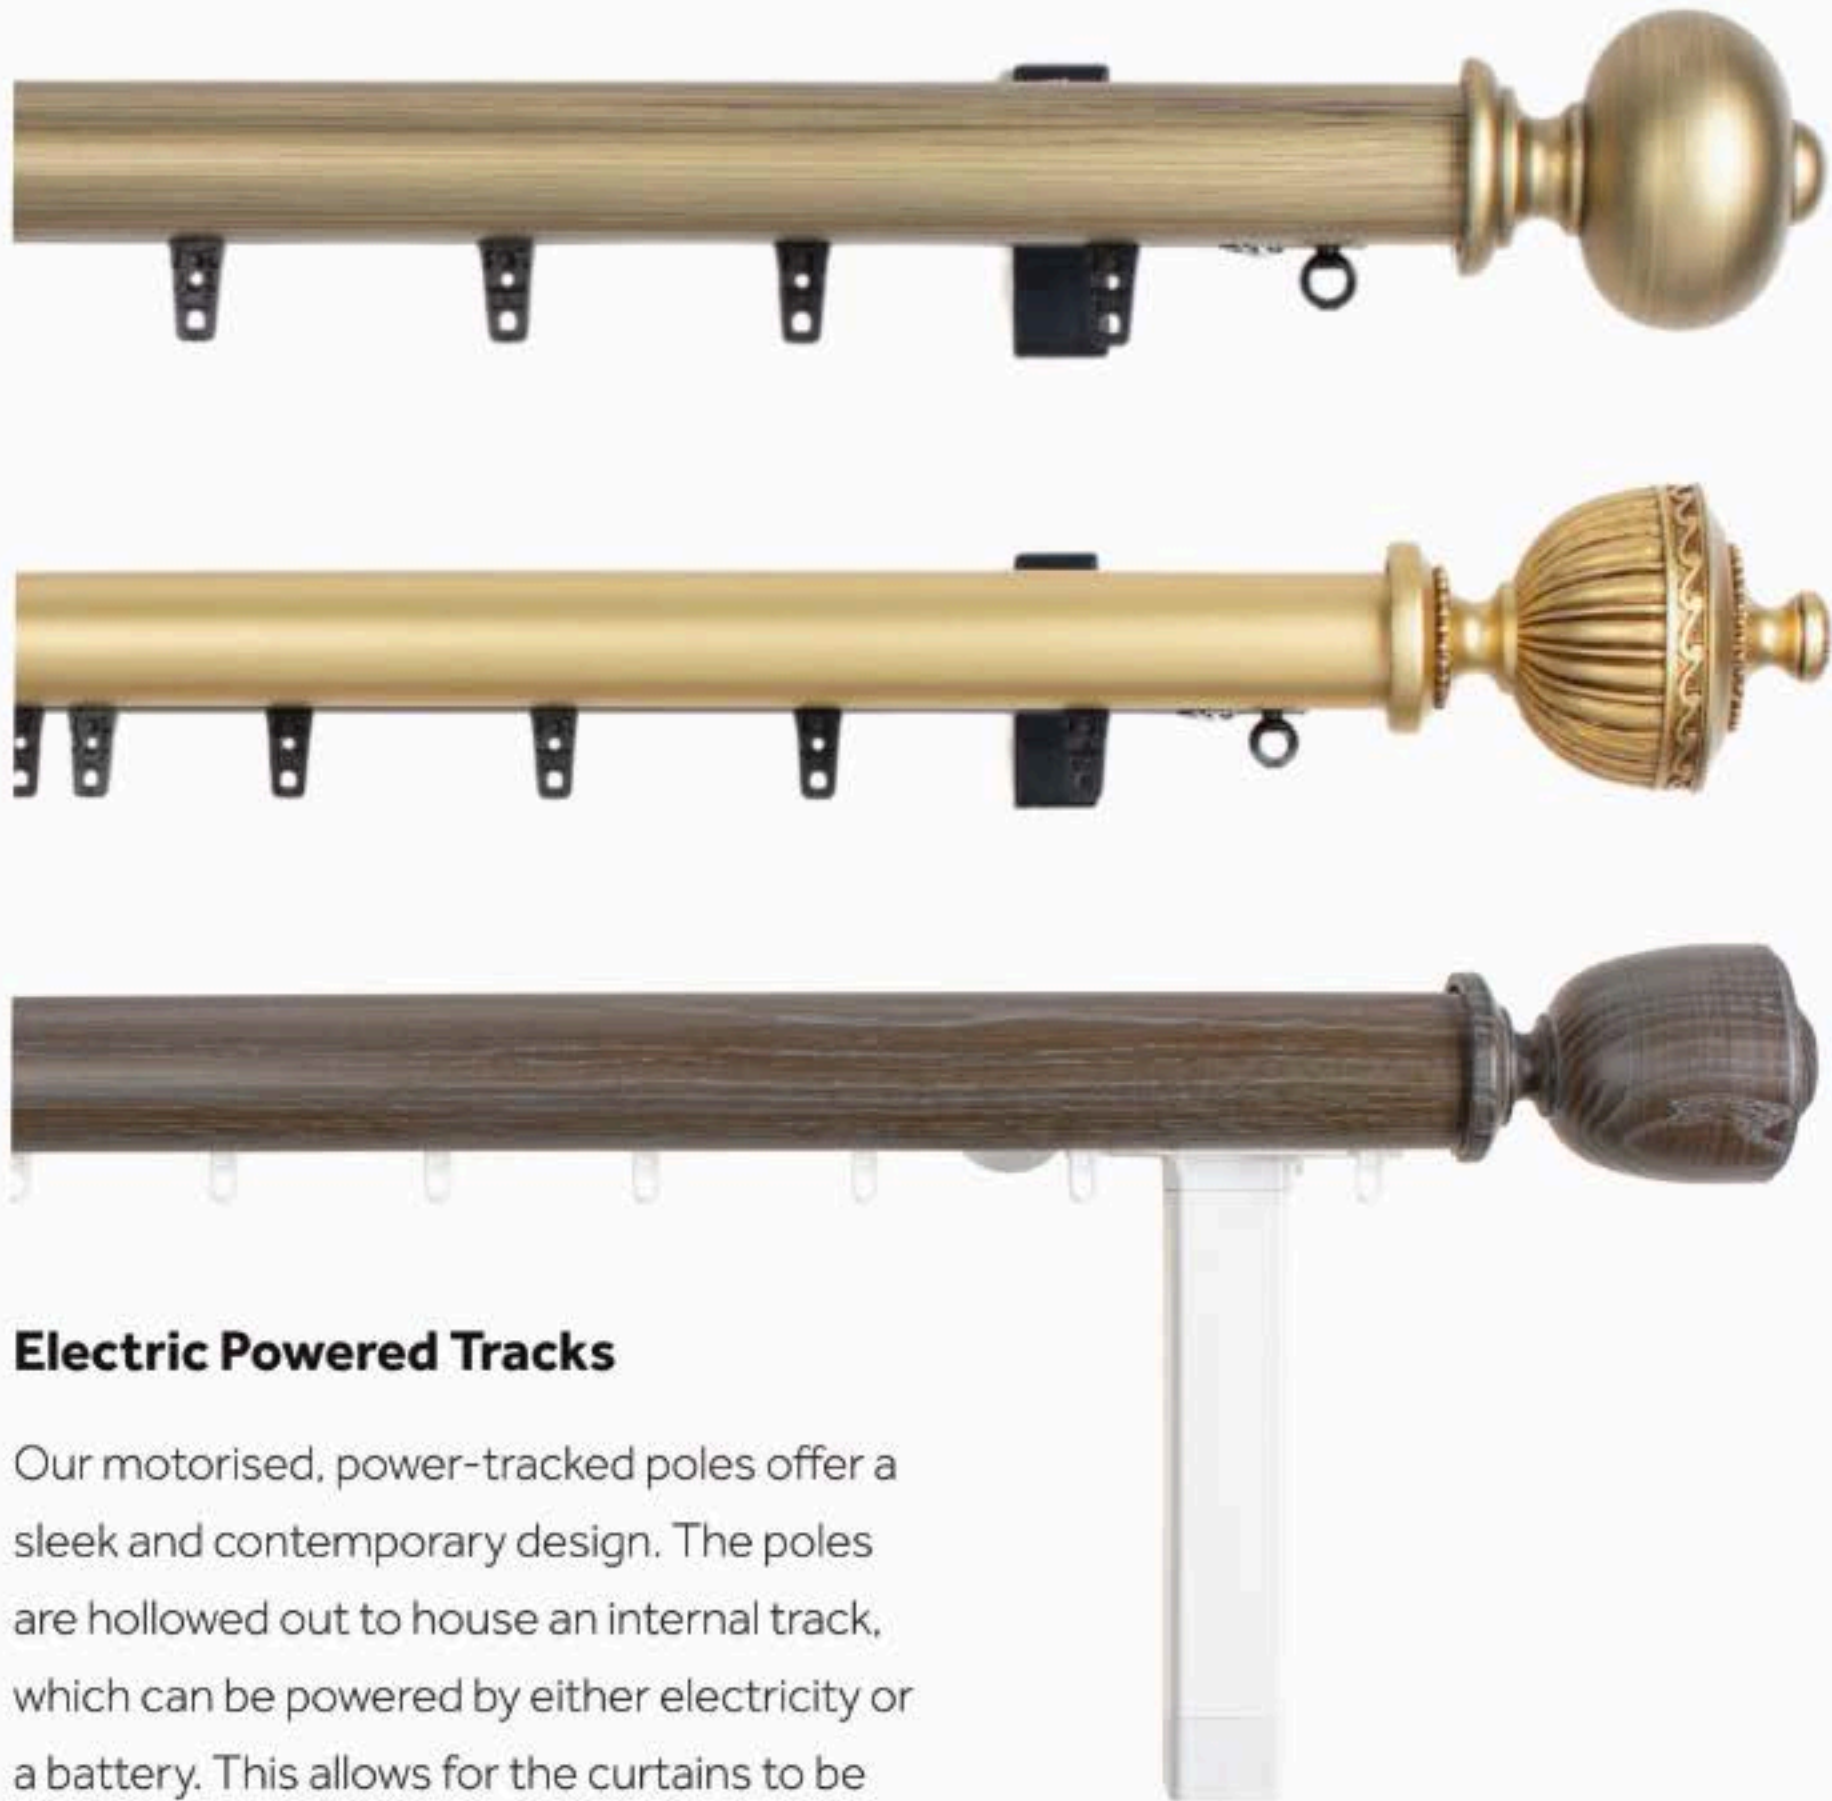

## Decoupage

We can cover most of our poles with fabric or wallpaper. Please note that some paper and fabrics are not suitable for this treatment and the colour or fabric may be subject to a slight change in texture or tone due to the protective coating that we use.

# Tracks

We can supply any of our 35mm, 45mm, 55mm poles tracked and corded.

## Electric Powered Tracks

Our motorised, power-tracked poles offer a sleek and contemporary design. The poles are hollowed out to house an internal track, which can be powered by either electricity or a battery. This allows for the curtains to be smoothly opened and closed at the touch of a button, keeping them free from touch and damage, leaving the fabric to stay beautifully clean for longer. This is also a perfect solution for large windows with heavy drapes or curtains that are difficult to open due to their location.

# Bay Pole

## **Unique curves for your bay window**

Metamorph is the first wooden curtain pole that follows the unique curve of your bay window. A carefully engineered system providing a silent, smooth, durable and decorative solution for most bay window configurations. Poles are available in 45, 55mm diameters and in all finishes. Each bay pole is supplied in one fixed piece, with rings and tracks.

## POLMET

This collection offers a sleek tracking system that can accommodate panels, blinds, sheers, wave headed or even a more traditional pencil pleat curtain solution. In a selection of opulent and matt finishes, they can fit into smaller wall-spaces between the window and ceiling; perfect for where you are looking to add more than one window treatment and also for new build interiors.

We aim to ensure everything in our brochure is as accurate as it can be, But of course, sometimes colours and finishes may be slightly different due to the printing process and therefore it's always best to see a sample which we are happy to provide. All descriptions and sizes are correct at the time of going to print but may change in the future.
